DNA REPORT

DATE: June 12, 1996
ANALYST: M. Scarpetta
LAB NUMBER:B96-0035

The following items were analyzed for DNA types:

E8 Windbreaker
 E9 Windpants
 G Christina Brown, Reference Blood
 H Lamarr Munson, Reference Blood

DNA types were obtained using the PCR (Taq polymerase chain reaction) amplification and allele typing of the HLA-DQ α , the low density lipoprotein receptor (LDLR), glycophorin A (GYPA), hemoglobin G gammaglobin (HBGG), D7S8, group specific component (GC) and D1S80 loci. The types detected for each sample are listed below.

DNA ANALYSIS DATA

<u>ITEM</u>	<u>DESCRIPTION</u>	<u>HLA-DQ</u>	<u>LDLR</u>	<u>GYPA</u>	<u>HBGG</u>	<u>D7S8</u>	<u>GC</u>	<u>D1S80</u>
E8	Windbreaker	ND	ND	ND	ND	ND	ND	ND
E9	Windpants	1,2,4	B	AB	AB	AB	BC	20,21
G	Christina Brown	1,2,4	B	AB	AB	AB	BC	20,21
H	Lamarr Munson	1,2	B	AB	A	AB	AC	24,28

KEY: ND = Not Determined. DNA was of insufficient quantity or quality for the determination of DNA types.

DNA REPORT (CONT)

DNA ANALYSIS CONCLUSION

Christina Brown cannot be excluded as a source of the DNA obtained from the windpants (Item E9).

The probability of randomly selecting an unrelated individual with a DNA profile consistent with the windpants and the reference blood taken from Christina Brown in the U.S. African American, Caucasian and Hispanic population are as follows:

<u>Population Database</u>	<u>Frequency</u>
African American	1 in 160,000
Caucasian	1 in 1,100,000
Hispanic	1 in 1,100,000
